

Fractyl Health Welcomes Dr. Timothy Kieffer as Chief Scientific Officer

Sep 14, 2023

Seasoned Expert Joins to Drive Fractyl's Pioneering Mission Forward with its Revita® and Rejuva® Programs for Type 2 Diabetes and Obesity

Dr. Kieffer's Stellar Track Record Spans Pioneering Academic Research in Diabetes Mechanisms and Industry Experience with Company Formation and Leadership

LEXINGTON, Mass.—([BUSINESS WIRE](#))— Fractyl Health, a metabolic therapeutics company focused on pioneering new approaches to the treatment of metabolic diseases, including type 2 diabetes (T2D) and obesity, proudly announces the appointment of Dr. Timothy Kieffer as its Chief Scientific Officer. Dr. Kieffer's unparalleled expertise in gut and pancreas biology and the development of gene and cell therapies for diabetes will further bolster Fractyl Health's vision of reshaping diabetes care and metabolic health.

Previously, as the Chief Scientific Officer at ViaCyte Inc., a company at the forefront of stem cell-derived treatments for diabetes, Dr. Kieffer played a pivotal role in advancing the firm's scientific strategy. His leadership and innovative mindset were instrumental in guiding ViaCyte towards its successful acquisition by Vertex Pharmaceuticals in 2022.

"I'm thrilled to be able to work with Dr. Kieffer to advance our scientific programs at Fractyl Health. He is a globally recognized academic leader in gut biology and pancreatic gene therapy, and has been a trusted advisor for several years," said Harith Rajagopalan, MD, PHD, CEO of Fractyl Health. "Tim's experience as a scientific visionary and his passion for translational medicine will be invaluable as we push T2D and obesity from management toward prevention and remission."

Dr. Kieffer has dedicated his career to advancing therapies that can change the lives of people with diabetes. As a leader of the Life Sciences Institute's Diabetes Research Group and a professor at the University of British Columbia, his commitment to translating scientific discoveries to patient benefits has led to groundbreaking research and the development of novel modalities of treatment in diabetes. Taking his experience from academia to industry and now to Fractyl Health, Dr. Kieffer embodies a holistic understanding of the journey from research to real-world application.

Upon his appointment, Dr. Kieffer said, "The opportunity to work with the team at Fractyl Health is an exciting chapter in my mission to deliver transformative solutions to patients with metabolic diseases. Fractyl's approach to addressing root causes of metabolic diseases is important and necessary, and I am thrilled to contribute to a vision that seeks not just treatment but potentially disease eradication."

About Fractyl Health

Fractyl Health is a metabolic therapeutics company focused on pioneering new approaches to the treatment of metabolic diseases, including type 2 diabetes and obesity. Despite advances in treatment over the last 50 years, T2D and obesity continue to be rapidly growing drivers of morbidity and mortality in the 21st century. Fractyl Health's goal is to transform metabolic disease treatment from chronic symptomatic management to durable disease-modifying therapies that target the organ-level root causes of disease. Fractyl Health is based in Lexington, MA. For more information, visit www.fractyl.com or www.twitter.com/FractylHealth.

About Rejuva®

Fractyl Health's Rejuva® platform focuses on developing next-generation adeno-associated virus (AAV)-based, locally delivered gene therapies for the treatment of T2D and obesity. The Rejuva platform is in preclinical development and has not yet been evaluated by regulatory agencies for investigational or commercial use. Rejuva leverages advanced delivery systems and proprietary screening methods to identify and develop metabolically active gene therapy candidates targeting the pancreas. The program aims to transform the management of metabolic diseases by offering novel, disease-modifying therapies that address the underlying root causes of disease.

About Revita®

Fractyl Health's lead product candidate, Revita®, is based on the company's insights surrounding the potential role of the gut in metabolic diseases. Revita is designed to remodel the duodenal lining via hydrothermal ablation (i.e., duodenal mucosal resurfacing) to edit abnormal intestinal nutrient sensing and signaling mechanisms that are a potential root cause of metabolic diseases. Revita has received a CE mark in Europe and, in January 2022, received reimbursement authorization through NUB in Germany. In the United States, Revita is for investigational use only under US law. A pivotal study of Revita in patients with inadequately controlled Type 2 Diabetes despite multiple medicines and insulin, called Revitalize 1, is currently enrolling in the United States and Europe.
